

Flipgrid Video Recording Options

To record a Flipgrid video that does not show your face, see instructions for three options below:

1. Flip the camera around to show a garden or different landscape (backyard, park, plants) while you record your audio.
2. Obscure the video image by adding a photo of your outdoor classroom or another garden, farm, or natural area before recording your audio. See three-part instructions for this option below:
 - 2a. Create a white or black background by selecting the board option

- 2b. Select the 'photo' option

2c. Upload a photo and hit the red button to record!

3. Use the board option function to show a white or black background before recording your audio.
